

Hospital School for Patients

Hospital School for Patients

At the Zurich Children's Hospital School, our goal is to give your child all the necessary resources to ensure their continued educational development. We provide teaching from kindergarten through high school.

Focusing on your child's strengths, and through custom tailored classes, we help motivate your child to achieve its maximum potential. We set realistic, attainable goals that best suit your child's situation.

We can accommodate most special needs and situations. We use a wide range of activities to create a stimulating environment, such as writing exercises, games, puzzles, music, wood craft and art classes.

Working closely with your child's home school, we strive to make sure that your child doesn't fall behind in its studies. We keep a very close contact with the child's home school.

Our goal is to give your child a quality education and hopefully help it focus on positive things.

We also work closely with other caregivers, such as physiologists, art therapy specialists and anyone else who may be contributing to your child's education and well-being.
