**Publikationsliste Pneumologie 2012-2016**

Meyer Sauteur PM, Moeller A, Relly C, Berger C, Plecko B, Nadal D; Swiss Pediatric Surveillance Unit (SPSU).

Jantzen A, Opoku-Pare M, Bieli C, Ruf K, Hebestreit H, Moeller A.
Perspective on cystic fibrosis and physical activity: Is there a difference compared to healthy individuals? Pediatr Pulmonol. 2016, 51:1020-1030.

Hafen GM, Grenzbach AC, Moeller A, Rochat MK.

Phyisological phenotyping of pediatric chronic obstructive airway diseases.

Lung clearance index and moment ratios at different cut-off values in infant multiple-breath washout measurements.

Yammine S, Summermatter S, Singer F, Lauener R, Latzin P.
Feasibility of nitrogen multiple-breath washout in inexperienced children younger than 7 years.

Changes in breathing pattern upon 100% oxygen in children at early school age.

Functional evidence for continued alveolarization in former preterms at school age?

Yammine S, Singer F, Latzin P.
CFTR-modulating therapies in cystic fibrosis: not only for older patients.

Singer F, Casaulta C, Latzin P.
Structure-function relationship in early CF lung disease.

Pulmonary Function Test Abnormalities in Pediatric Inflammatory Bowel Disease.
Respiration. 2015, 90:279-86.

False normal Lung Clearance Index in infants with cystic fibrosis due to software algorithms.

Moeller A, Carlsen KH, Sly PD, Baraldi E, Piacentini G, Pavord I, Lex C, Saglani S; ERS Task Force
Monitoring Asthma in Children..
Monitoring asthma in childhood: lung function, bronchial responsiveness and inflammation.
Monitoring asthma in childhood: management-related issues.
Eur Respir Rev. 2015, 24:2194-203.

Lødrup Carlsen KC, Pijnenburg MW; ERS Task Force Monitoring Asthma in Children.
Monitoring asthma in childhood.
Eur Respir Rev. 2015, 24:2178-86.

Monitoring asthma in children.
Eur Respir J. 2015, 45:906-25.

Novel antiviral properties of azithromycin in cystic fibrosis airway epithelial cells.

The burden of severe asthma in childhood and adolescence: results from the paediatric U-BIOPRED cohorts.

Clinical and inflammatory characteristics of the European U-BIOPRED adult severe asthma cohort.

Summermatter S, Singer F, Latzin P, Yammine S.
Impact of software settings on multiple-breath washout outcomes.
PLoS One. 2015, 10:e0132250

Alternative outcomes for the multiple breath washout in children with CF.
J Cyst Fibros. 2015, 14:490-6.
Steinmann M, Abbas C, Singer F, Casaulta C, Regamey N, Haffner D, Fischer DC, Simonetti G. 
Arterial stiffness is increased in asthmatic children. 

Bigler A, Yammine S, Singer F, Riedel T, Latzin P. 
Feasibility of automated slope III and Scond analysis in children. 

Schmidt A, Yammine S, Proietti E, Frey U, Latzin P, Riedel T, Singer F. 
Validation of multiple-breath washout equipment for infants and young children. 

JE, Robinson PD, Rosenfeld M, Singer F, Starner TD, Ratjen F, Morgan W. 
Multiple-Breath Washout as a Lung Function Test in Cystic Fibrosis. A Cystic Fibrosis Foundation Work- 
shop Report.

Yammine S, Lenherr N, Nyilas S, Singer F, Latzin P. 
Last Word on Viewpoint: Using the same cut-off for sulfur hexafluoride and nitrogen multiple-breath wash- 
out may not be appropriate. 

Yammine S, Lenherr N, Nyilas S, Singer F, Latzin P. 
Using the same cut-off for sulfur hexafluoride and nitrogen multiple-breath washout may not be appropri- 
ate. 

Diminished HLA-DR expression on monocyte and dendritic cell subsets indicating impairment of cellular 
immune in pre-term neonates: a prospective observational analysis. 

Scherrer MJ, Rochat MK, Inci D, Moeller A. 
Reference equations for ultrasound bone densitometry of the radius in Central European children and ad-
olescents. 

Rajkumar S, Stolz D, Hammer J, Moeller A, Bauer GF, Huynh CK, Röösli M. 
Effect of a smoking ban on respiratory health in nonsmoking hospitality workers: a prospective cohort 
study. 

Rajkumar S, Schmidt-Trucksäss A, Wellenius GA, Bauer GF, Huynh CK, Moeller A, Röösli M. 
The effect of workplace smoking bans on heart rate variability and pulse wave velocity of non-smoking
hospitality workers.

Double tracer gas single-breath washout: reproducibility in healthy subjects and COPD.

Yammine S, Bigler A, Casaulta C, Singer F, Latzin P.
Reasons for heterogeneous change in LCI in children with cystic fibrosis after antibiotic treatment.

Can infant lung function predict respiratory morbidity during the first year of life in preterm infants?

Gonem S, Singer F, Corkill S, Singapuri A, Siddiqui S, Gustafsson P.
Validation of a photoacoustic gas analyser for the measurement of functional residual capacity using multiple-breath inert gas washout.

Abnormal small airways function in children with mild asthma.

Yammine S, Singer F, Gustafsson P, Latzin P.
Impact of different breathing protocols on multiple-breath washout outcomes in children.

Ventilatory response to nitrogen multiple-breath washout in infants.

Exhaled nitric oxide in symptomatic children at preschool age predicts later asthma.
Allergy. 2013, 68:531-8.

Spirometry reference equations for central European populations from school age to old age.

Lura MP, Demet I, Jung A, Knoepfl B, Wildhaber JH, Moeller A.
Comparison of treatment guidance based on bronchial responsiveness to mannitol, spirometry or exhaled nitric oxide in stable asthmatic children.
Inhaled aztreonam lysine vs. inhaled tobramycin in cystic fibrosis: a comparative efficacy trial.

Abbas C, Singer F, Yammine S, Casaulta C, Latzin P.
Treatment response of airway clearance assessed by single-breath washout in children with cystic fibrosis.

High rhinovirus burden in lower airways of children with cystic fibrosis.

Yammine S, Singer F, Abbas C, Roos M, Latzin P.
Multiple-breath washout measurements can be significantly shortened in children.

Practicability of nitrogen multiple-breath washout measurements in a pediatric cystic fibrosis outpatient setting.

A new double-tracer gas single-breath washout to assess early cystic fibrosis lung disease.
Eur Respir J. 2013, 41:339-45.

Consensus statement for inert gas washout measurement using multiple- and single-breath tests.
Eur Respir J. 2013, 41:507-22.

Borer D, Yammine S, Singer F, Rösgen T, Latzin P, Obrist D.

Triggering of specific Toll-like receptors and proinflammatory cytokines breaks allergen-specific T-cell tolerance in human tonsils and peripheral blood.
A Th17- and Th2-skewed cytokine profile in cystic fibrosis lungs represents a potential risk factor for Pseudomonas aeruginosa infection.

Diagnostik der primären ziliären Dyskinesie.

Jung A.
Primäre Ziliendyskinesie – wann besteht Verdacht auf diese seltene Krankheit?
Ars Medici 2013, 11:14-17.

Jung A.
Primäre Ziliendyskinesie – wann besteht Verdacht auf diese seltene Krankheit?
Pädiatrie 2013, 4:29-32.

Validation of activity questionnaires in patients with cystic fibrosis by accelerometry and cycle ergometry.

Integrin α3 mutations with kidney, lung, and skin disease.

Buehler T, Steinmann M, Singer F, Regamey N, Casaulta C, Schoeni MH, Simonetti GD.
Increased arterial stiffness in children with cystic fibrosis.

Singer F, Houlitz B, Latzin P, Robinson P, Gustafsson P.
A realistic validation study of a new nitrogen multiple-breath washout system.
